

# EAST COAST METALS

Manufacturers of quality metal roofing products

## STORAGE INSTRUCTIONS FOR METAL COMPONENT PRODUCTS

East Coast Metals is committed to providing the high quality metal component products, consistent customer satisfaction, high quality control standards and full product line. Special packaging is added to maintain that quality.

The follow are per industry's procedural standards and must be followed to prevent premature oxidation.

1. **All galvanized metal component products must be kept dry at all times.**
2. **All galvanized metal component products must be stored inside a covered area.**
3. **All galvanized metal component products must be stacked off the ground to prevent humidity and/or moisture from accumulating.**
4. **All galvanized metal component products must be repackaged when original packaging has been opened.**
5. **All galvanized metal component products must be protected from high humidity, moisture and/or the elements.**
6. **All galvanized metal component products must be wiped dry and resealed when condensation occurs due to temperature variations.**  
**IMPORTANT:** East Coast Metals, Inc. will not be held responsible for failure and/or neglect of improper storage and handling. Failure to follow these storage instructions could result in damage of the galvanized metal component products and will void any guaranties and warranties. ©2007 9/14 East Coast Metals Inc.
